October 28th, November 4th

November 11th and, **if needed**, November 18th

After the last pick up, any leaves must follow

Village Brush Pick-up Guidelines and

Be in brown paper bags.

Do it Yourself Home Water Pipe Inspection

The Village of Leicester needs your help to identify all unknown water service lines for the Village’s water customers

WHO SHOULD INSPECT THEIR PIPES?

ALL Village water customers need to inspect and test your pipes

For those who are unable to send this application back, please let the Village know and we will reach out to you to make arrangements for a home inspection by Village water personnel.

WHAT YOU WILL NEED:

- Magnet (A refrigerator magnet will do)
- Screwdriver or coin (To gently scratch your pipe)
- Flashlight

STEP 1: LOCATE your Pipe. Find your water meter and the pipe connected to the ground or wall. This pipe comes in from the street and will be the focus of the test.

Step 2: TEST and INSPECT the pipe to see what you have. If your pipe is a bright blue with a smooth finish and flexible, you have PLASTIC which is resistant to corrosion. If the pipe is brownish-orange in color, like a penny, or has turned green over time due to oxidation, AND your magnet will NOT stick to it, you have a COPPER pipe. You do not need a pipe replacement.

If your pipe appears metallic check to see if your magnet can stick to the pipe, If the magnet sticks, you have GALVANIZED STEEL pipe. If you cannot demonstrate that your line was never downstream of a lead line, it will need to be replaced. Use the penny or screwdriver to GENTLY scratch the surface of the pipe to remove any coatings or dirt to reveal the material underneath.

If your pipe is dark in color, is very soft, and easy to scratch, and the scratched surface looks shiny and silvery, AND your magnet will NOT stick to it, you likely have a LEAD pipe and it will need to be replaced.

Step 3: REPORT your pipe type! Please mail or leave the detached portion of this form with the Village office.

Please fill out the below information and return to the Village of Leicester or visit <https://www.villageofleicester.org/lead-survey-form> to fill out the online form.
